

TAKE WINTER HEAD-ON

ICE BLAZER
ARCTIC

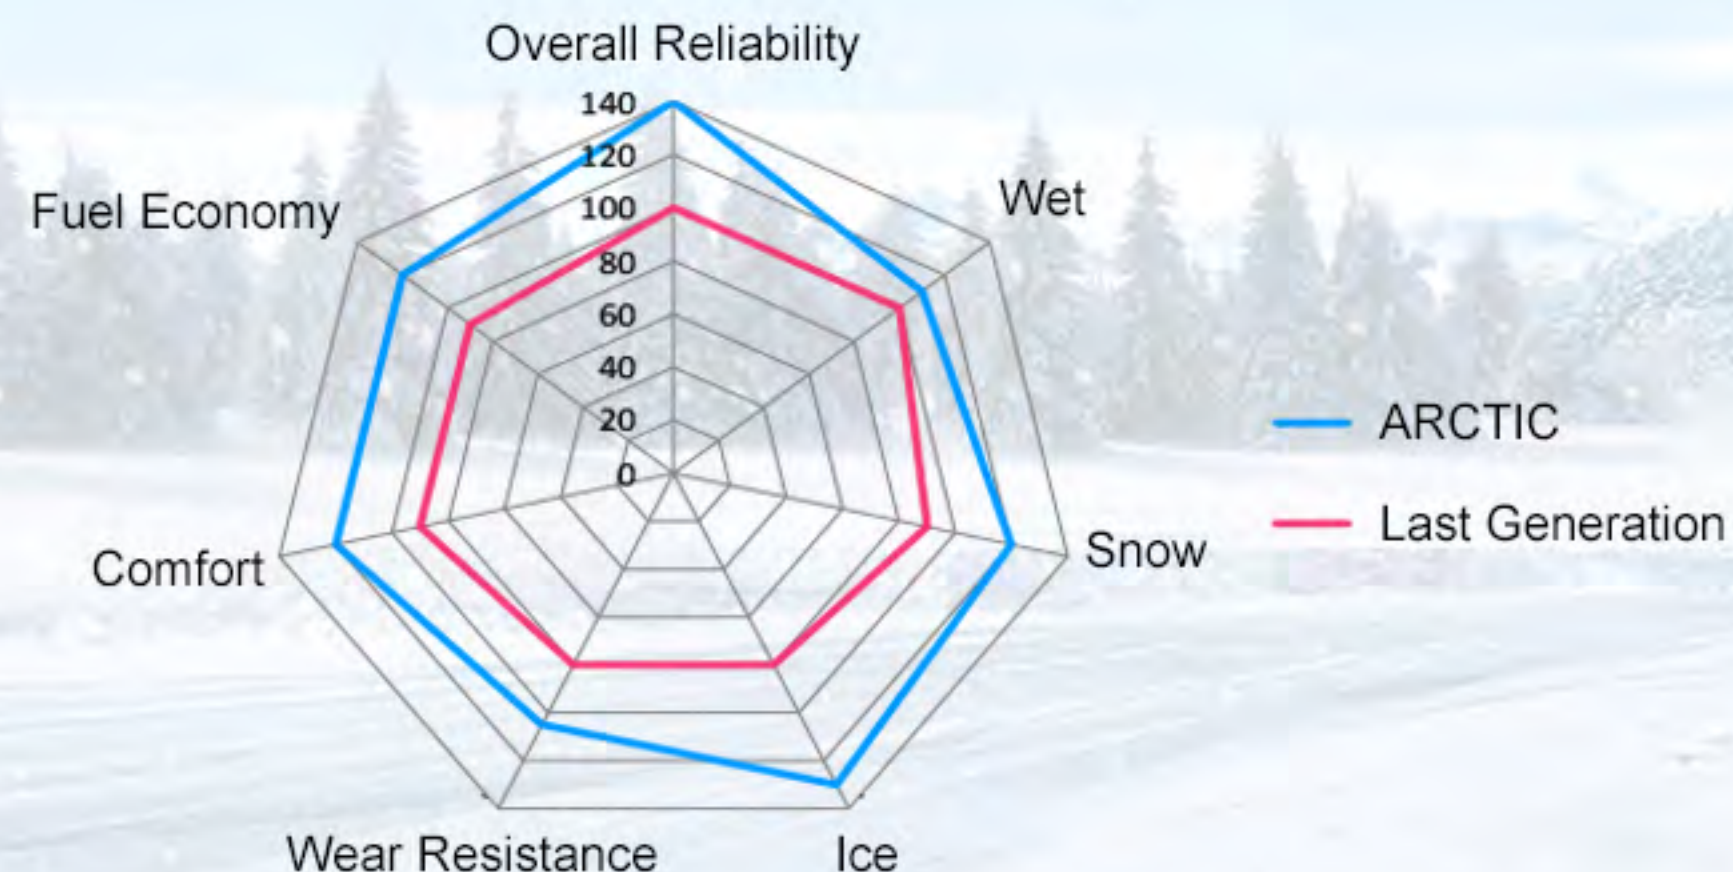

ICE BLAZER
ARCTIC SUV

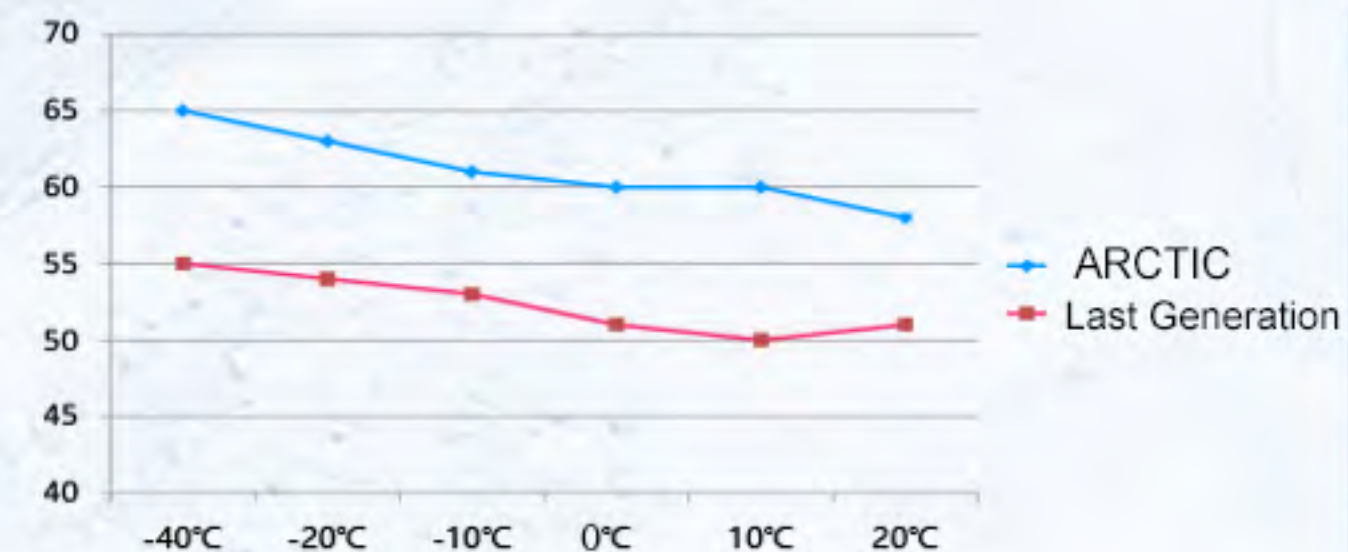

ICE BLAZER
ARCTIC EVO

Introducing the newest line of studless winter tire products from Sailun Tire, the Ice Blazer Arctic, Arctic SUV, Arctic EVO! The Ice Blazer Arctic product series was developed specifically for Northern Europe and offers three distinct product designs suitable for the most intense winter weather conditions. The series employs a new Nordic compound that significantly improves performance on ice and snow, brings good improvements to driving comfort and fuel economy, while also maintaining strong wear resistance.

PERFORMANCE COMPARISON

| Test Conditions | Recipe | Last Generation | ARCTIC |
|-----------------|--------|-----------------|--------|
| -40°C | | 65 | 55 |
| -20°C | | 63 | 54 |
| -10°C | | 62 | 53 |
| 0°C | | 61 | 62 |
| 10°C | | 61 | 51 |
| 20°C | | 58 | 51 |

ICE BLAZER
ARCTIC

ICE BLAZER
ARCTIC SUV

ICE BLAZER
ARCTIC EVO

This studless performance winter tire is designed with an asymmetric tread pattern which offers greater grip, handling, and braking capabilities for a more focused performance enhancement on ice and snow. The ICE BLAZER ARCTIC comes in 28 different common sizes ranging from 14in to 18in.

- **INNER TREAD ELEMENTS:**

The z-shaped inner tread elements help to increase the tire footprint. The high density multi-angle siping improves grip allowing for easier braking on ice and snow.

- **OUTER TREAD ELEMENTS:**

Various crisscrossing grooves and sipes effectively pack and discharge snow. This improves overall grip for efficient braking and handling on ice and snow.

- **WINTER COMFORT:**

The groove pattern effectively reduces tire vibration with its sound absorbing groove design while also efficiently breaking through and discharging ice and snow.

- **SIPE DESIGN:**

The tread blocks are separated into a dense group of sipes which improve tire traction on snow and ice. At the base of the sipes is a specialized design which interlocks the sipes to enhance block stiffness for improved tyre endurance and driving performance on wet and dry roads.

This studless performance winter tire is focused on providing a more comfortable and efficient drive with a tread pattern and shoulder design that offers consistent grip and increases the tire's contact area for greater control on ice and snow. The ICE BLAZER ARCTIC SUV comes in 13 different sizes at 16in, 17in, and 18in.

- **WINTER SUV TREAD:**

The tread block sipes are designed to improve grip on both ice and snow.

- **HANDLING AND ENDURANCE:**

The overall shoulder design increases handling for improved driving comfort and ensures consistent performance throughout the tyre's lifetime. The specialized shoulder block design enlarges the tire contact area and enhances lateral traction.

This studless ultra high-performance winter tire is designed with an asymmetric tread pattern which offers greater grip, handling, and braking capabilities for a more focused performance enhancement on ice and snow. The ICE BLAZER ARCTIC EVO comes in 24 different sizes ranging from 18in to 21in, including 3 runflat sizes.

- **OUTER TREAD ELEMENTS:**

Wide shoulder blocks deliver more effective traction for enhanced braking performance when driving on ice and snow.

- **INNER TREAD ELEMENTS:**

Staggered narrow grooves improve traction for safer driving on ice and snow.

- **INTERLOCKED SIPES:**

Tread blocks are separated by a dense group of jagged sipes which bite into ice and snow for improved traction. These sipes are also interlocked to enhance block stiffness for greater driving performance in wet and dry conditions.

- **INNER SHOULDER GROOVES:**

Jagged shoulder grooves effectively grip to ice and snow for enhanced traction.

- **OUTER SHOULDER DESIGN:**

The special outside shoulder design improves grip in deep snow for overall safer driving.
